

**Kawasaki Robot**

# Medical and Pharmaceutical Robot

MCR04N

## Hollow wrist

Through-arm cable and tube technology eliminates cable interference

## Compact body

Short and compact arm design is ideal for narrow or confined spaces

## Cleanroom classification

Meets ISO Class 5 (Class 100 of US FED STD 209E) cleanroom standard

## Sanitary features

Streamlined design features a smooth surface, high performance seals, and a chemical resistant epoxy paint finish to facilitate decontamination process

## Human arm-like

Human arm-like joint configurations provide minimal dead space and allow robot to rotate and operate in constricted workspaces
